

Meraki MR32 shown

With the #1 cloud-based provider of Wi-Fi technology by your side, your network will be reliable and easily accessible by your iPad Point of Sale at all times. Rest assured you will never lose connection as you move throughout the floor with true zero handoff. Whether you're on the go or working from home, you can quickly monitor your Wi-Fi network from anywhere so you always have an eye on its performance. Take control of your Wi-Fi environment with Meraki access points today.

Meraki Access Points

Power your business with Meraki access points.

Zero handoff

Effortlessly connect all access points on your network and ensure zero delays or drops as you move throughout the floor.

Easy setup

Meraki access points are a plug and play solution – just plug them in and they're ready to go. Revel also provides your business a floor plan analysis to help with heat mapping and optimal access point placement.

Remote control

Monitor and control your Wi-Fi network from anywhere, at anytime. Have the freedom to download configurations and update firmware remotely.

Band steering

For maximum performance, Meraki access points automatically configure to the the best Wi-Fi channel according to the environment.

Top of line security

With advanced firewall settings and access to Revel's 24/7 support line, your Wi-Fi network is fully protected at all times.

iPad compatibility

All Revel iPad Point of Sale systems work seamlessly with Meraki access points.
