

The Whozz Calling? POS reports telephone line number and Caller ID information including date, time, caller's number and caller's name. This information is sent via serial stream to any serial device such as a printer or computer immediately after the Caller ID data is captured, enabling you to be across every missed called during your busy periods.

## Caller ID POS2 Ethernet Link

Immediately capture caller ID data

### Connectivity

- Supply Voltage: 9 VDC, center negative
- Supply Current: Less than 250 mA
- Loop Current Draw: Less than 1 mA
- Loop Voltage: 30 to 105 VDC
- Ringing Voltage: 60 to 130 VAC
- Insertion Loss: Less than 0.3 dB
- Voltage Drop: 2.7 VDC at 20 mA loop current
- Ringer Equivalence: (REN) 0.1B
- Dimensions: 10.9cm x 8.3 x 3.8cm
